Hey! I'm Razvan, a frontend jedi who believes great web experiences shouldn't need a manual.

Over the past few years, I've helped everyone from lean startups to global giants like Vodafone build fast, scalable, and delightfully usable web apps. I specialize in writing clean, maintainable React/TypeScript code and building UIs that feel like second nature to users.

Work Experience

Frontend Engineer

Apr 2020 - May 2025

[Seenit](#) | London (Remote)

- Led features in frontend development for Seenit's next-gen video editing platform as part of a 3-person team, contributing to a 50% increase in platform engagement year-over-year.
- Built scalable UI components with React and Atomic Design, reducing frontend development time by 30% and improving design consistency across the platform.
- Developed an AI-powered in-house editor using Adobe Express assets and automation tools, cutting manual editing effort and accelerating content production workflows.
- Implemented intelligent features like content recommendations and auto-enhancements to boost creativity.
- Optimized UI performance through profiling, testing, and following development best practices.
- Integrated GraphQL APIs to streamline data fetching, leading to a 35% decrease in API call overhead and faster frontend rendering speeds.
- Resolved over 100 production issues and deployed critical hotfixes with <24-hour turnaround, ensuring 99.9% platform uptime.
- Collaborated effectively in a remote environment, mentoring juniors, leveraging tools like Slack, Zoom, and Notion to ensure clear communication, alignment, and productivity across distributed teams.

Frontend Engineer

Sep 2018 - Apr 2020

[Vodafone](#) | London (Hybrid)

- Helped develop Vodafone UK's new checkout system as part of a 6-person frontend team, contributing to a 25% increase in checkout conversion rates post-launch.
- Built scalable, consistent UI components using React and Atomic Design.
- Boosted app performance and responsiveness by optimizing critical rendering paths and reducing bundle size by 35%, improving page load time by 1.8 seconds.
- Fixed production bugs and deployed hotfixes to ensure a smooth user experience.
- Supported feature releases with staging tests and CI/CD deployment.
- Collaborated cross-functionally in Agile squads with product and design teams, increasing sprint velocity by 15% and improving delivery predictability.
- Onboarded new developers by sharing workflows and codebase knowledge.

Junior Frontend Developer (intern)

Mar 2018 - Sep 2018

[Bitbee Ltd](#) | London (Remote)

- Collaborated with cross-functional teams to design and optimize high-converting landing pages, resulting in a 20% improvement in user engagement.
- Conducted performance audits and implemented front-end optimizations, reducing page load times by up to 40% using tools like Lighthouse.
- Applied UX best practices to improve user flows and interface responsiveness, leading to increased session duration and conversion rates.

Core Skills

Frontend: React, Typescript, UI/UX, HTML5/CSS3, NextJS, Tailwind, ShadCN, Storybook, AI Integration

Backend: GraphQL, NodeJS, Express, CI/CD

Tools: Vite, Vitest, Vercel, AWS, GCP, Cypress, Playwright, E2E Testing, React Testing Library, Agile, SCRUM, Product Development, Authentication, CMS, Copilot, Claude

Strengths: Communicative, Creative, Energetic, Leader, Passioned, Problem-solver, Team -player, Visionary

Education

Maritime University

Bachelor of Engineering in Maritime Navigation

Languages

English (Fluent), Romanian (Fluent), French (A1/A2)

Interests

Travelling, Cooking, Streaming, Gaming
